HOW TO USE THIS PATTERN:

1.   Print two (2) copies of the pattern: one to use as a stencil on the pumpkin itself
       and one to use as a reference image.
2.   Secure the pattern onto the surface of your pumpkin and use a toothpick or poking tool
       to dot the outline of the pattern onto the pumpkin.
3.   Now, follow the color-coding on the pattern and
       a) cut away the parts shaded in black,
       b) shave down, or peel away the parts shaded in gray, and
       c) leave the unshaded/ white areas of the pattern alone.
